Vadim Kalinin
Senior iOS Developer

ABOUT ME

I'm a **Senior iOS developer** with **over 5 years of commercial experience**. I have worked in cross-functional teams ranging **from 9 to 37 people**, using Scrum methodology on international products, including Uzum Bank and Simple.Life. I am proficient in UIKit, architectural patterns, code testing and UI design. During my career, I contributed to the development of apps that have reached **over 25 million installs in total**.

Elementary proficiency

EDUCATION

Bachelor's degree, Computer Engineering
National Research Nuclear University MEPhI

Master's degree, Computer Engineering
National Research Nuclear University MEPhI

EXPERIENCE

Senior iOS Developer · Mar 2023 - Sep 2025 · **2 yrs 7 mo**

Uzum Bank · Uzbekistan, Tashkent · Full-time
A top digital bank in Uzbekistan with 13% of the online payments market and its own infrastructure for instant payments and fast card issuance.

Worked in Uzum Bank product team - a core part of entire Uzum ecosystem. Implemented core banking capabilities in high-load multi-module mobile app used **over 40%** of Uzbekistan's residents.

- Designed **dynamic dashboard module dispaying real-time metrics** (DAU, LTV, retention), reducing analyst dependency and speeding up product decision-making.
- Rearchitectured **5 core screens from WKWebView** to native solutions, reducing UI bugs and impoving app stability (**bug-free rate impoved by 0.8%**).
- Directed development of **BDUI (Backend-Driven UI)** rendering system, allowing for fast interface changes without app releases, decreasing UI backlog and designer-developer friction.

- Stack: Swift, iOS 15+, MVVM, UIKit, SwiftUI, Combine, GCD, Async/Await, URLSession, SPM, XCTests, CI/CD

iOS Developer · Aug 2020 - Mar 2023 · **2 yrs 8 mo**

Palta · UK, London · Full-time

Worked on Coach Avo, an AI-powered coaching module inside the Simple.Life app - product with 15M+ downloads and #1 spot in the US App Store Health category.

- In collaboration with designer, built a chat design system in UIKit, including **20+ reusable components (buttons, alerts, bars etc.)**, that increased the number of interface A/B tests in 3 times per month.
- Using Hitches and Time Profiler, identified and fixed **4 high-priority UI perfomance bugs** by implementing pre-calculated cell sizing and caching cell sizes.
- Developed **new UIKit-base chat components** that allowed users to receive detailed, personalized responses with links to their health data and deep links to other modules. As a result, Coach Avo became one of the most popular features in the app and **increased subscription conversion by 3.4%**.

- Stack: Swift, UIKit, MVVM+C, RXSwift, GCD, URLSession
